

**Pleasure**  
Standard  
+ Inktrap

---

[Type story](#)

---

The Pleasure font is almost a running grotesque font. However, its geometric shapes did not resist the urge to be led, for certain letters, to an extrapolation of the terminals by converting them into loops. A characteristic that gives Pleasure an original taste and a certain irony in the rolling of the eyes. Started in March 2020 by Mothi Limbu from FlirtStudio, Pleasure has already this extra fresh and funny approach but has also already the smart to combine soft but well balanced letterforms.

During one year, from sketches, PizzaTypefaces has brought some correction and developed the whole character sets supporting all Latin languages. Alternates forms have been added you can find them ranged by family in the appropriate stylistics sets.

Pleasure typeface offers a total of 20 styles into 2 distinctive families, Standard and Inktrap. Here are the weights - Light, Regular, Medium, Bold and Black. All weights have a windy companion as italic.

As we put constantly our effort to offer variable font, Pleasure is also available in flexible format where 3 axes can be customized into software. Here are the axes - weight, inktrap and italic.
